

Patti Chapman
The Myelin Project

Patti has lost two brothers - one to ALD when he was 5 years old and one to AMN when he was 44 years old. Her oldest son, Michael (36 years old), suffers from AMN.

Patti is excited to serve on the LCN Steering Committee to join with other families who have experienced or are experiencing the heartbreak of a leukodystrophy affliction. Patti says, "There is power in our numbers..."

Her hope is for multiple "one-stop" shops for leukodystrophy patients. She feels this will help temper and, hopefully, alleviate the overwhelming acceptance of these diseases.

Patti lives in Pacific Palisades, California.
